

WHAT IS THE SUVEN STUDY ABOUT?

The purpose of this study is to find out whether the medicine, Masupirdine (SUVN-502), has a positive effect on treating agitation related to Alzheimer's disease

WHO CAN PARTICIPATE?

Individuals who are:

- Age 50+ years of age
- Diagnosis of Alzheimer's disease
- Experiencing agitation symptoms due to onset of Alzheimer's disease
- A study partner who will accompany you to all study visits

WHAT DOES THE SUVEN STUDY ENTAIL?

The study includes:

- Memory tests
- Questionnaires and interviews on how well you manage daily routines
- Questionnaires and interviews to track symptoms related to agitation
- Blood samples
